A little about Earthen Returns, our products and our philosophy...

- ☞ We care about what we put on our skin and it shows in the ingredients we choose.
 - Avocado oil
 - Beeswax
 - Castor oil
 - Coconut oil
 - Jojoba oil
 - Olive oil
 - Sesame oil
 - Shea butter
- ☞ Each oil brings different qualities we want to impart to our soaps. The oils we choose...
 - Make biodegradable soap.
 - Naturally contain vitamins: A, B1, B2, B6, D, and E.
 - Naturally contain minerals: calcium, copper, iron, magnesium, and zinc.
 - Have a chemical composition very close to the skin's own oil.
 - Make lasting bubbly lather with a silky feel.
 - Cleanse effectively but mildly.
 - Act as natural humectants that attract and hold moisture.
- ☞ We do not remove the glycerine, a beneficial natural by-product of saponified oils that is usually removed from commercial soaps for sale in more profitable cosmetics.
- ☞ **Read our labels!** We do not add synthetic thickeners or preservatives, phosphates, phthalates or other endocrine disruptors, foaming agents (including sodium lauryl sulfate), detergents (including ammonium- and sodium-laureth sulfate), synthetic humectants (including propylene glycol), and other petroleum-derived products. We also offer fragrance- and color-free soaps.
- ☞ We support domestic suppliers, with a preference for local and small businesses that provide renewable products. Our sponges are ecologically harvested for maximum sustainability.
